

SemanticSplat: from captured evidence to graph-pruned grounding

ONE-TIME MAP CONSTRUCTION

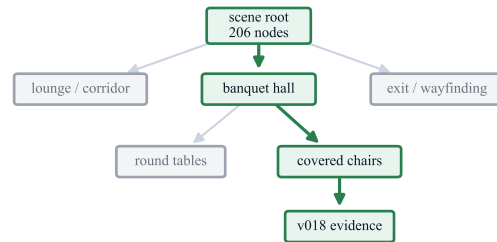

A Posed RGB-D capture

B Semantic ViewJSON record

C Deterministic hierarchy assembly

five scenes: 97 views | 1,066 items | 66,937 input / 179,817 tree token-equiv.

PER-QUERY RETRIEVAL

D Natural-language query

"Find the white covered chairs"

target covered chairs
attribute white

E Graph-pruned vs. flat traversal

views: 3 vs 20 | estimated context: 555 vs 3,110 tokens

F Grounded evidence

graph hit@1: yes | 2.07x speedup | 82.2% fewer est. tokens
