

# SemanticSplat: from captured evidence to graph-pruned grounding

## ONE-TIME MAP CONSTRUCTION

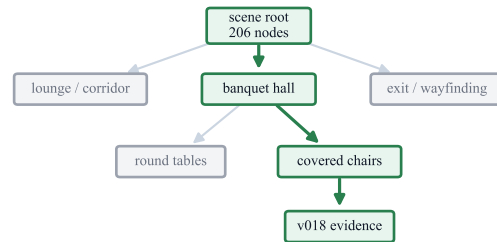

### A Posed RGB-D capture

### B Semantic ViewJSON record

### C Deterministic hierarchy assembly

five scenes: 97 views | 1,066 items | 0 provider construction tokens

## PER-QUERY RETRIEVAL

### D Natural-language query

target covered chairs  
attribute white

### E Graph-pruned vs. flat traversal

views: 3 vs 20 | estimated context: 555 vs 3,110 tokens

### F Grounded evidence

graph hit@1: yes | 2.07x speedup | 82.2% fewer est. tokens
